REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art 895" disclose a control apparatus for hybrid vehicle wherein a torque reduction request is outputted during a speed shift, the amount of torque reduction achieved by a motor-generator, of a requested amount of torque reduction, is set to a greatest-possible amount, and the amount of engine torque reduction achieved by an engine is set to a smallest-possible amount. However, it fails to disclose the claimed invention to have a control system for a hybrid vehicle having a power transfer unit adapted to drive a vehicle wheel and a power source adapted to drive the power transfer unit, the system comprising: a local torque monitor associated with the power source and adapted to implement a local torque mitigation strategy to inhibit undesired torque; and a vehicle level torque monitor adapted to implement a vehicle level torque mitigation strategy to inhibit acceleration of the hybrid vehicle if the local torque mitigation strategy does not successfully inhibit undesired torque nor does the prior art disclose a method for monitoring and controlling torque in a hybrid vehicle, the method comprising: calculating first and second torque values representing estimates of the driving torque; determining whether the first and second torque values are within a limit range; implementing a local torque mitigation strategy with the local torque monitor to inhibit undesired torque if the first and second torque values are not within the limit range; and implementing a vehicle level torque mitigation strategy with the vehicle level torque

monitor if the local torque mitigation strategy does not cause the first and second torque values to fall within the limit range in a set period of time. These limitations are neither taught nor obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
